

Municipal Training Worksheet

Please Take This With You!

THANK YOU!

Overview

This exercise is designed to allow the municipal treasurer to become familiar with the Municipal Collections program. In order to get the most out of the training, this exercise will concentrate on those portions of the program most commonly used by the municipal treasurer.

This segment of the training will be divided into three “batches” simulating the most common day-to-day operations of the municipal treasurer. Each batch will consist of:

- Creating a New Batch
- Processing Payments and other typical Day-to-Day activities
- Using Reports to Balance Daily Collections
- Closing the Batch

Each batch will add progressively more activities, so the customer can start off slowly and gradually learn more of the programs functionality.

Batch Number One – 111001 – December 21, 2022

Overview: Batch One is designed to introduce (or re-introduce) the user to Municipal Collections. As such, it will concentrate on the different search and payment methods available to the user.
